### Ericsson AB

UX/UI design intern

May 2021-Aug 2021

### My Projects

#### RESPONSIBILITIES:

- Responsible for designing a functional service monitoring UI by understanding the user needs and cloud-native applications design methodologies.
- I collaborated with other designers to prepare the UX design document aligned with the business use-cases requirements.
- Conducted workshops and feedback sessions internally to understand the business flow and overall user experience.
- Installed Kubernetes cluster locally on the machine to visualize and design the prototype with real experience.

### Bravida

UX design student

2 months

#### RESPONSIBILITIES:

- I conducted user interviews to understand customer's behaviors, created artifacts for presenting insights to the client.
- In the second phase of this project, I created wireframes and prototypes and tested those with users.

### Ericsson AB

UX design student

1 month

#### RESPONSIBILITIES:

- I created use-case flows to understand the overall business use case related to handling a large organizational hierarchy of nodes/massive devices. Involved in wireframing, prototyping in Adobe XD.

### Ricola

UX design student

1 month

#### RESPONSIBILITIES:

- I worked as a product owner in an agile team.
- Responsible for user research, creating & testing prototypes in Figma.
- Setting up UI design styles for the final product together with the front-end developers.
